

FIKILE NKOSI

Primary Ridge

“She was cooking outside—she told me that I have no paraffin. I have no nothing this is why I am cooking outside. I am not working, I have no money for paraffin—take the photo for me and tell all the world ‘how poor are we here in South Africa’

If you don’t have paraffin you can’t cook. Paraffin stove is not healthy for people, I like to say that and I always say that—its not right for people. And the smoke when it comes out your eyes getting sick and your chest getting sick”

“We’re poor here in South Africa.
If you rich here, you rich more.
If you poor, you poor more.”
